Lynx Web Application-Hosting Plans

-You purchase our Lynx software & we host it for you-

Lynx Hosting is a service package we offer should you need hosting & hardware required after purchasing the Lynx software. We include the SQL server & database along with everything else you'll need to take advantage of the Lynx Photo Manager application.

If you ever decide to switch from Lynx hosting your media, to an in-house solution where you are hosting yourself, it is very easy to export your data from our server & import to yours.

Basic Premium plan is available for those without a need for high volume photo capacity. RAID system, incremental and nightly backups with 7 day retention* included.

Our Ultimate plan (most popular) we currently offer a SSL certificate, domain name and data will be hosted on a RAID system, incremental and nightly backups with 7 day retention* included.

*Additional storage space can be added if needed. Our compression feature will allow you to store up to ten times the amount of images in the same amount of disk space (making your 1TB storage capable of storing the same amount of images as 10 TB).

It is very simple & easy to migrate from our hosted plan to your own in house server should you choose to ever host your own data at a future point in time. Please contact us if you require something unique or different.

Premium/\$1199 per year	<ul style="list-style-type: none">• OS: Windows Server 2008 Standard 64-bit• RAM: 4 GB• Storage: 50 GB / Bandwidth: 2,000 GB/mo
